

ENERGY MANAGEMENT SYSTEM POLICY

DALEKOVOD MK Ltd. is committed to sustainable development, achieving a balance between the environment, society and its activities in order to meet the needs of today without compromising the prospects of future generations to meet their needs. Sustainable development, transparency and compliance with requirements (of interested parties, norms, laws) are a component of the economic growth of the Company.

The scope of energy management system in Dalekovod MK Ltd is: Designing, developing, manufacturing and selling of the metal structures, and providing metal processing services. Steel structures for power lines, substations and switchgear, roads and railways, buildings, lighting, reflector poles and antenna towers.

The adopted policy applies to all facilities, processes, organizational units and energy sources at the production location, by which the Company undertakes to:

- △ continuously work on increasing the company's energy performance by adopting and implementing a program of energy guidelines and goals,
- △ provide resources and information that are necessary for carrying out the necessary activities of the energy management system,
- △ monitor and fulfill all applicable legal requirements and regulations in the field of energy efficiency and energy use and consumption,
- △ when procuring energy, machinery and other equipment, and when investing and reconstructing, include requirements for energy efficiency to the extent that it is economically justified, and
- △ promote awareness of rational use of energy among employees and other persons under the supervision of the company.

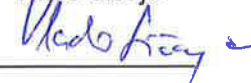

The energy policy is available through the bulletin board and the company's website to all employees and the interested public.

At least once a year, the company reviews and, depending on the need, changes the energy policy.
